

Master Content Transition & Update Manual

Complete Guide for Updating EMBTA Website from Demo to Real Association Data

1. Purpose of this Document

This master specification document provides the Executive Council and Secretariat of the Eastern Maring Business & Traders Association (EMBTA) with a complete audit checklist of all authorized information, legal credentials, photographs, and documents required to transition the live website from demo templates to 100% verified, authentic content.

2. Page-by-Page Content Audit Summary

Page / Route	Key Placeholders to Replace	Primary File to Update	Action Required
Home Page (/)	Motto, headline, ESTD year, 4 wings descriptions, metric statistics.	src/data/siteConfig.ts	Supply verified member count & wing details.
About EMBTA (/about)	[Official Mission], [Official Vision], [Association History], milestones.	src/data/aboutData.ts	Copy verbatim text from registered constitution.
Executive Profile (/executive)	[Name] & [Biography] for 6 portfolios, plus executive portraits.	src/data/executiveData.ts	Submit 6 executive bios + 800x800 px photos.
Media Gallery (/gallery)	Demo photos, demo YouTube video (aqz-KE-bpKQ).	src/data/galleryData.ts	Provide real event photos and YouTube links.
News Bulletins (/news)	5 demo articles, sample dates, placeholder authors.	src/data/newsData.ts	Draft real official press statements.
Contact Desk (/contact)	[Association Address], [Phone], [Email], [Office Hours].	src/data/siteConfig.ts	Confirm official secretariat phone and address.
Global Footer	Centralized address, phone, email, registration details.	src/data/siteConfig.ts	Auto-updates when siteConfig.ts is edited.

3. Technical Architecture & File Directory Structure

The website is architected so that **no content is hardcoded across component files**. All content is organized in clean, structured TypeScript data modules in the src/data/ directory:

- src/data/siteConfig.ts — Association name, logo, contact coordinates, 4 wings, core values, navigation.
- src/data/aboutData.ts — Mission, vision, timeline milestones, purpose, and objectives.
- src/data/executiveData.ts — The 6 executive portfolios, council address, responsibilities.
- src/data/galleryData.ts — Media gallery items, YouTube embeds, categories.
- src/data/newsData.ts — Articles, publication dates, excerpts, body paragraphs, and tags.

4. Step-by-Step Deployment Workflow for Real Updates

Step 1: Fill out the checklist in each page's specific PDF document.

Step 2: Gather executive photographs and event photos into public/assets/.

Step 3: Update the corresponding file in src/data/.

Step 4: Test locally with npm run build.

Step 5: Commit and push to GitHub (git commit -am 'update: live content' && git push origin main).

Step 6: GitHub Actions will automatically rebuild and publish the live site within 60 seconds.
